ULS-ST Features (cont'd)

ILLINOIS COMMERCE COMMISSION
CHIEF CLERK'S OFFICE

ULS-ST Daily Usage Feed

The Company will provide a Daily Usage Feed (DUF) to each Carrier that subscribes to ULS-ST that contains, on a per-call basis, originating and terminating usage detail for each line-side ULS port used to provide ULS-ST. The DUF will include the available local (originating and terminating) and access (originating and terminating) usage records.

The Company shall not have any responsibility for providing any billing information to the end-user customers of a telecommunications carrier that purchases ULS-ST. The telecommunications carrier that purchases ULS-ST will be solely responsible for establishing compensation arrangements with all telecommunications carrier(s) to which traffic is delivered, or from which traffic is received, using ULS-ST, including all traffic carried by Shared Transport-Transit. The Company may provide information regarding such traffic to other telecommunications carriers as appropriate to resolve inter-carrier compensation issues.

Billing for 900 and 976 call or other pay-per-call services will be passed through to the Carrier when the Company records the message. If a Carrier does not wish to be responsible for 900 and 976 calls, it must assign appropriate Line Class Code (LCC) blocking to the ULS ports under this Part. When the Interexchange Carrier records the 900 and 976 calls, the call detail will be returned to the Interexchange Carrier.

Custom OS/DA Call Routing Capability

With a custom call routing capability for OS and/or DA ("OS/DA"), calls to a third party provider are available with ULS-ST as described in Part 19, Section 3 of this Tariff. Other requests for custom OS/DA provisioning can be requested via the Bona Fide Request process.
